EXPERIENCE

Full Stack Developer

February 2026 - Present

Lakbaygo Tech Digital Platforms (Contract)

- Led the development of a ride hailing MVP using Expo React Native and AWS cloud-native services. Built the mobile app and web admin features, while helping develop scalable backend systems for bookings, dispatching, and platform operations.

Cloud Engineer

July 2025 - Present

eCloudvalley Philippines (BGC, Taguig, Metro Manila - Hybrid)

- Handle major Philippine conglomerates and other big clients under managed services on AWS. Support both application and infrastructure work, including build and improvement tasks. Help deploy and troubleshoot cloud systems that serve millions of users across the country while assisting in keeping their platforms stable, secure, and efficient

Cloud Engineer Intern

April 2025 - May 2025

eCloudvalley Philippines (Bago City, Philippines)

- Contributed to an internal project by developing a serverless backend using TypeScript and AWS Lambda, and building a responsive frontend with Vue.js and Quasar. Utilized AWS services including S3, SES, and SQS to support scalable, cloud-native functionality.

Software Engineer Intern.

February 2025 - May 2025

Spring Valley Tech Corp (Bago City, Philippines)

- Engaged in an immersive on-the-job training at Spring Valley Academy that will be utilized to work for various clients locally and internationally.
